Creve Coeur Police Department Purchases Primary Marking's eTWIST® Evidence Tracking System

St. Louis – St. Louis-based Primary Marking Systems is pleased to announce that the Creve Coeur Police Department, serving a suburb of St. Louis, has ordered eTWIST® Field and Station kits.

Creve Coeur joins law enforcement agencies around the country that have purchased the eTWIST® evidence tracking system which allows police officers to collect, enter and scan evidence at the crime scene as well as in the police station.

eTWIST® Not only enhances evidence tracking capabilities, it improves efficiency. eTWIST®, Patent-Pending Mobile Evidence Collection Software Solution incorporates onsite handheld mobile computing devices for governmental agencies evidence collection and management environments. Primary Marking Systems' evidence Tracking With Information Solutions Technologies or, eTWIST® is a Bar-Code/RFID, Win Mobile and HTML 5 Browser based software, developed using web interfaces for cost efficient and easy adoption into an existing COTS, in house evidence collection systems, CAD/RMS (i.e. Motorola's Premier One) or as a standalone enterprise tool.

Designed for the unobtrusive collection and tracking of evidence, eTWIST® allows officers to Collect, Document, Photo, Geo-Track and Bar-Code evidence in the field using mobile devices such as PDA's, Smart Phones, and Laptops, then upload the collected information via an adaptor or cellular network option on the mobile handheld computing device, to law enforcement systems. Tying everything together with the Officers DSN, Case# and Time/Date stamp. "Protecting the Truth™".

According to research, 25 of every 100 cases require evidence tracking. Requiring an officer an average of two hours to enter repetitive evidence data information into an agency's back-end system, even longer if the report is handwritten. Recording the evidence at the crime scene with eTWIST® saves up to 50 man-hours each week -- the equivalent of one fulltime police officer per year.

eTWIST® Product Manager P.J. McIntyre notes, "With eTWIST®, officers are able to easily collect and record evidence and the property room has an indispensable tool when it comes to tracking evidence and securing a chain of custody record, using technology to help reduce City expenses."

For each eTWIST® station kit ordered by a St. Louis-area law enforcement agency, Primary Marking will donate \$200 to The Back stoppers Inc, a St. Louis nonprofit that helps the families of police officers and firefighters who have lost their lives. For each eTWIST® field kit ordered, Primary Marking will donate \$50. Primary Marking is pleased to make a \$250 donation to Back stoppers as a result of the Creve Coeur Police Department's order.
